

**AIGV Visual quality bad case 1: The bird and the sky behind it have poor detail and texture.**

**AIGV Visual quality bad case 2: The blurriness in sharpness is caused by the generation process, rather than by excessive speed or photographic factors.**

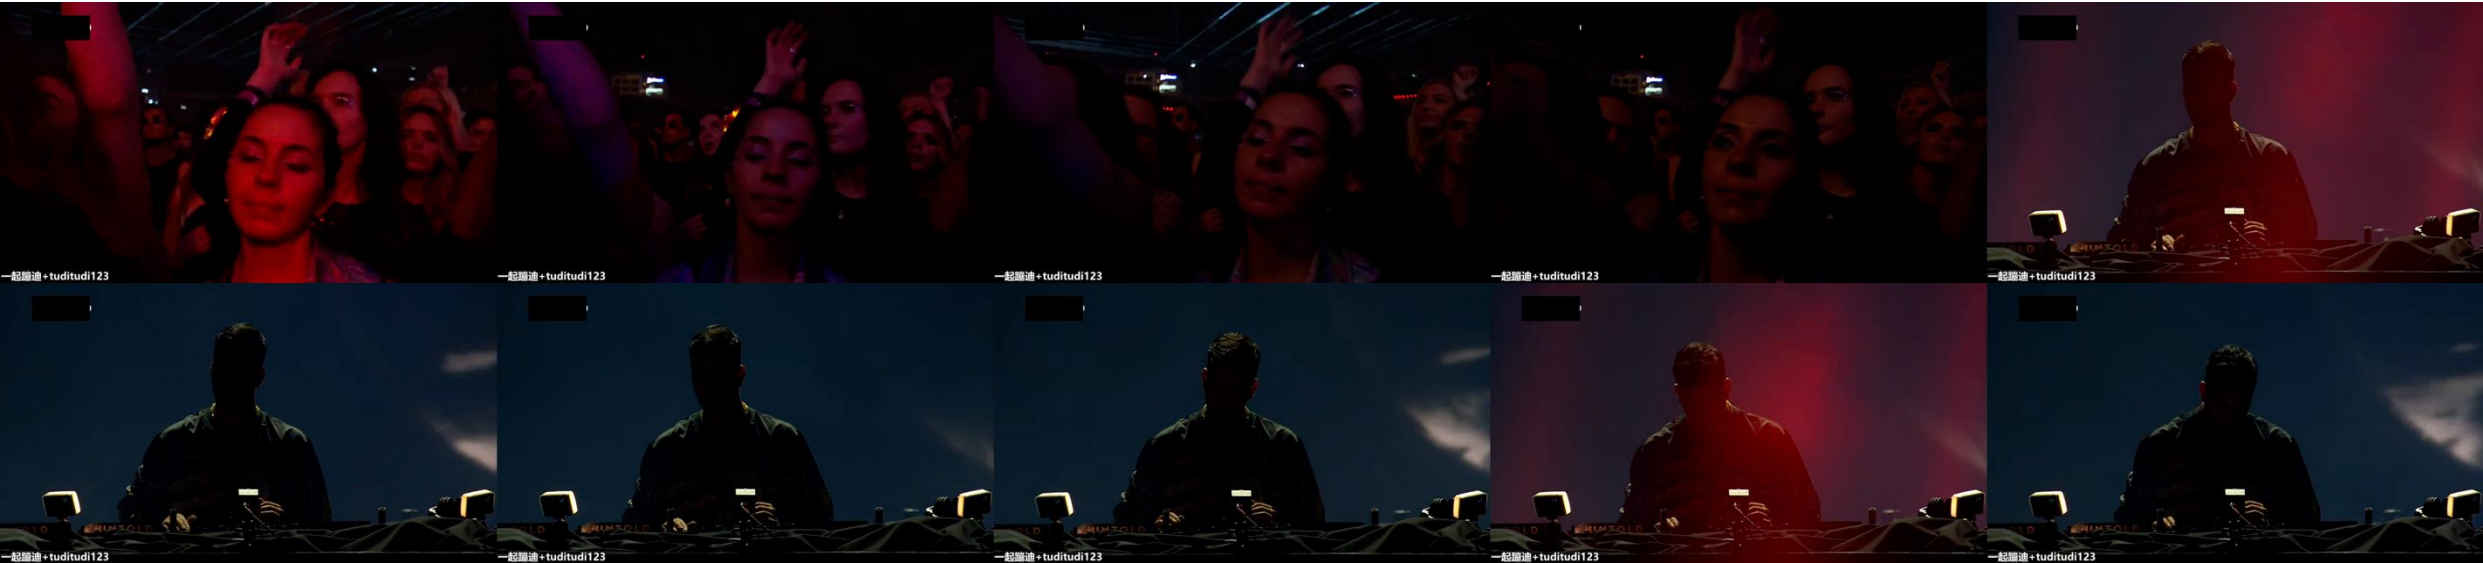

UGC Visual quality bad case 1: The loss of sharpness is caused by exposure issues and photographic factors.

UGC Visual quality bad case 2: Poor visual quality due to lighting issues.

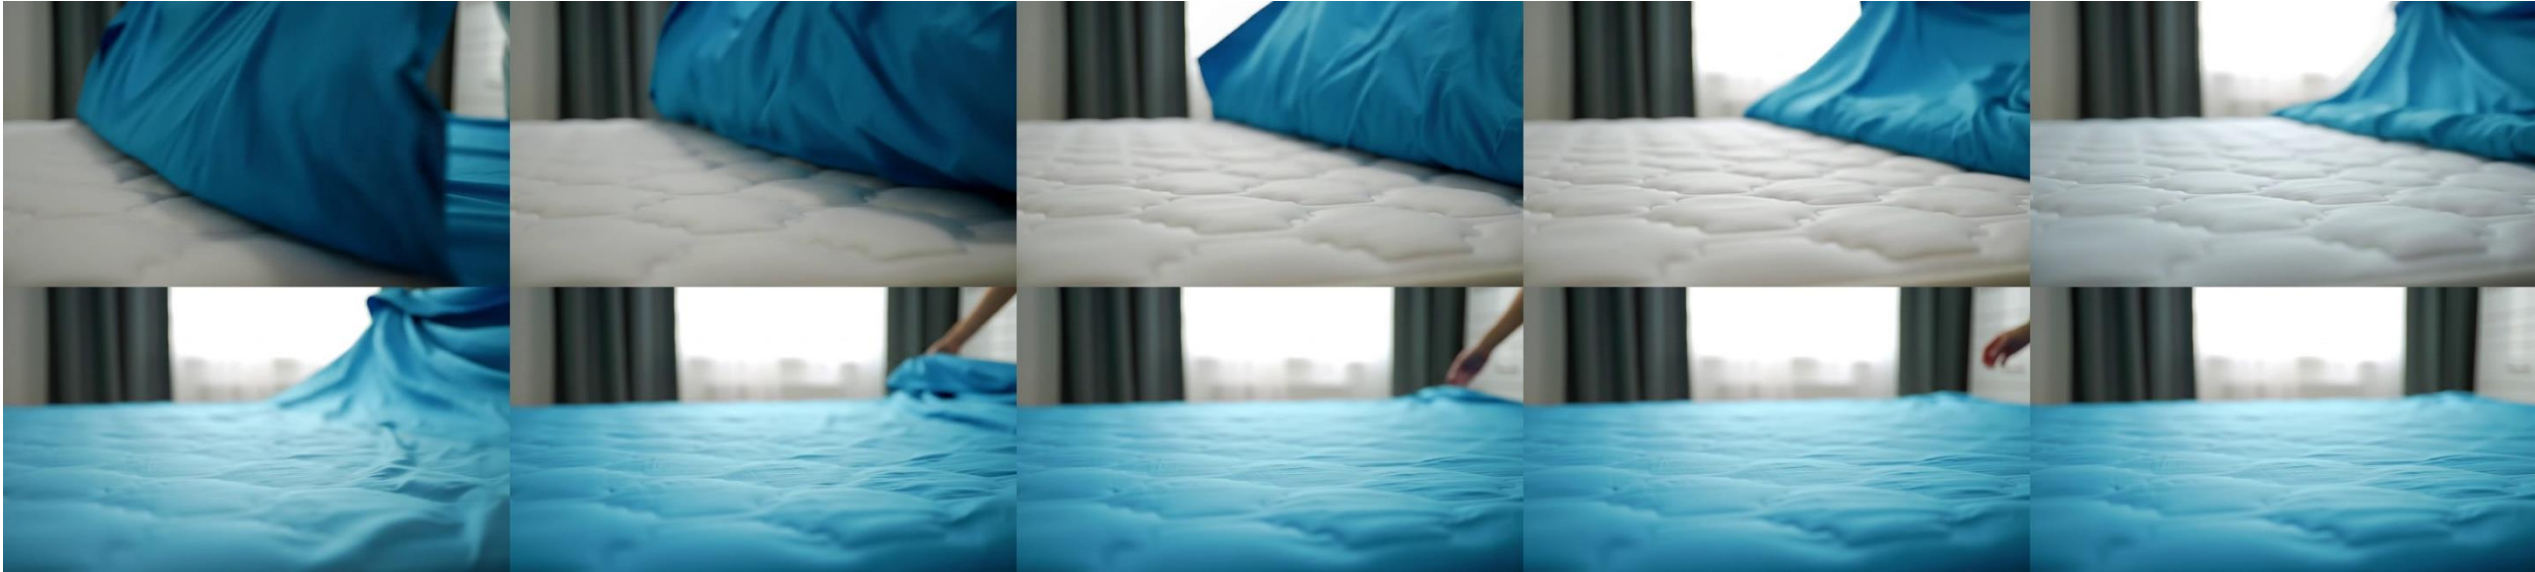

UGC Visual quality bad case 3: Poor visual quality due to exposure issues and camera resolution limitations.

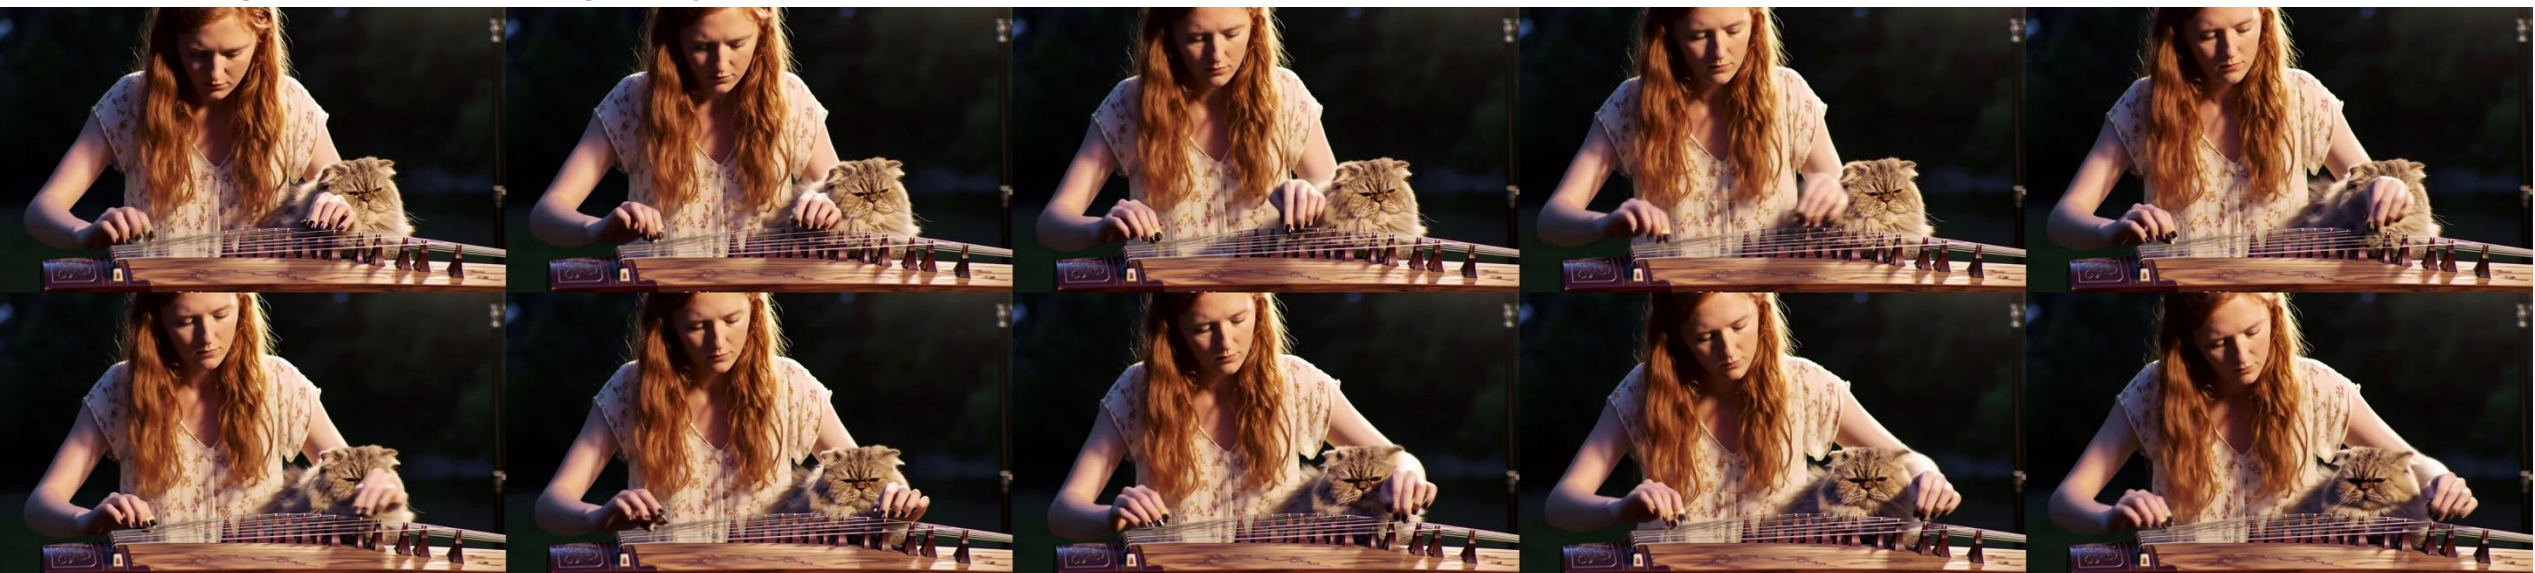

**AIGV Dynamic quality bad case 1:** The generated content clearly shows unrealistic blanket movement, changing from being flipped open to instantly covering the entire bed.

**AIGV Dynamic quality bad case 2:** The generated content shows the girl's hand passing through the cat, which is an AIGV-specific motion quality error.

UGC Dynamic quality bad case 1: Motion blur caused by fast movement.

UGC Dynamic quality bad case 2: Motion blur caused by special effects issues and fast movement.

UGC Dynamic quality bad case 3: Motion blur caused by fast movement.
